Professional profile:

Golang Backend developer. Main job experience working in multinational UK based software company, implementing third-party APIs for payment processing gateways for ecommerce platform and SaaS. I use Golang as my main language because it is strongly typed, concurrent, efficient and secure for developing scalable web applications to serve millions of users.
On the frontend side, I know HTML, CSS and Javascript at an intermediate level. I consider myself a passionate person, self-taught, fast learner and committed to deliver quality in everything I do.

---

1. Ginigo

UK-based e-commerce company with a worldwide presence.

Backend Developer (01,2022 - present)

- Develop and implement APIs for third party payment processing gateways (Stripe, Klarna, Paypal, Mollie, Authorize.net, etc) for e-commerce credit card payments, including subscriptions, refunds, pay later options and more. All of the above compliant with PCI DSS and 3Ds security protocols.

- Unit testing for each method implemented covering edge cases.

- Create checkout pages to test if the client and server are working as expected using the test scenarios provided by the payment gateways.

Skills: Golang · Data Structures · Docker · REST APIs · Payment Card Processing · Payment Gateways · Back-End Web Development · Software Development · API Development · GitHub · Git · JavaScript · Go (Programming Language) · MySQL

2. Freelance

Backend Developer (11, 2022 – present)
